

Upgrade

With the Easy Switch upgrade you can **extend the lifetime** of your dimmer equipment and comply with today's needs.

- ✓ A true, direct 230 Volt Easy Switch by output upgrade for different types of dimmers
- ✓ Every channel can provide fixed power to moving lights, LEDpars, boosters, audio amplifiers, beamers, active speakers, single phase motors, smoke machines etc.
- ✓ Don't buy new dimmers if they will be no more need for dimming within a couple of years!
- ✓ Upgrade now to prepare for the future without further expensive investments to infrastructure
- ✓ A stand-alone upgrade with customizable options

Innovate

The innovative design of the Easy Switch upgrade makes your installation **more flexible**.

- ✓ Smart upgrade for house dimmers, touring racks and portable dimmers
- ✓ Conversion of individual modules regardless of the age of your installation
- ✓ Hook up any object that requires fixed, safe 230V or use the channel as a conventional dimmer.
- ✓ Responding to EU regulations, as tungsten lighting will phased out in the future
- ✓ Exclusive install by the developers

Energy Transition

Drag your installation into the 21st century with the Easy Switch **upgrade**. Taking part in the energy transition has never been so simple and cost effective.

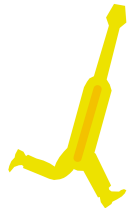

- ✓ Transition away from conventional incandescent and halogen light bulbs.
- ✓ Don't shell out money for a distro instead of a dimmer, let the Easy Switch do it for you.
- ✓ Improve the energy efficiency of your building by adapting your dimmers with a simple, cost-effective upgrade.
- ✓ Modernize your energy infrastructure to fit your framework and meet strict carbon emissions.
